

Surefuser™ PLUS

Elastomeric Infusion System

Safe, comfortable, reliable
The ideal solution for all your infusion-related therapies

Product Quality

- Flat and well designed control unit calibrated at skin temperature ensures accurate reliability
- Integrated infusion line
- Minimal residual volume
- Quick priming time
- Easy to fill for pharmacy, low filling force is needed
- Backed with extensive drug stability data
- An in line clamp prevents leakage
- Wide range of flow rates and fill volumes available to suit most infusion therapies
- Steady flow rate through constant elastomeric pressure (isoprene balloon)

Flow Control Unit

Flat and well-designed flow control unit ensuring accurate and reliable operation.

Filter

Efficient particulate self venting filter (0.2µ)
